# ABOUT US

A TEAM OF WORKERS  
EQUIPPED WITH LEADING  
EDGE TOOLS AND  
MACHINERY TO OFFER  
IMPECCABLE FINISHING  
STANDARDS

# ABOUT US

In 2011, **Texcon y Calidad S.L.** was created by a group of clothing manufacture professionals from Spain's Castilla y La Mancha region.

Since then, **Texcon y Calidad** has steadily consolidated its position in a high-quality segment of the market, equipping its workforce with leading-edge tools and machinery to offer impeccable finishing standards.

In addition, the company has invested in infrastructure and equipment to meet the needs of clients with a leading position in the domestic and international markets, in the children's and men's and women's apparel segments.

Thanks to our structure and production capacity, we can make almost any kind of garments:

- Dresses.
- Jackets and coats.
- Shirts and blouses.
- Trousers and skirts.

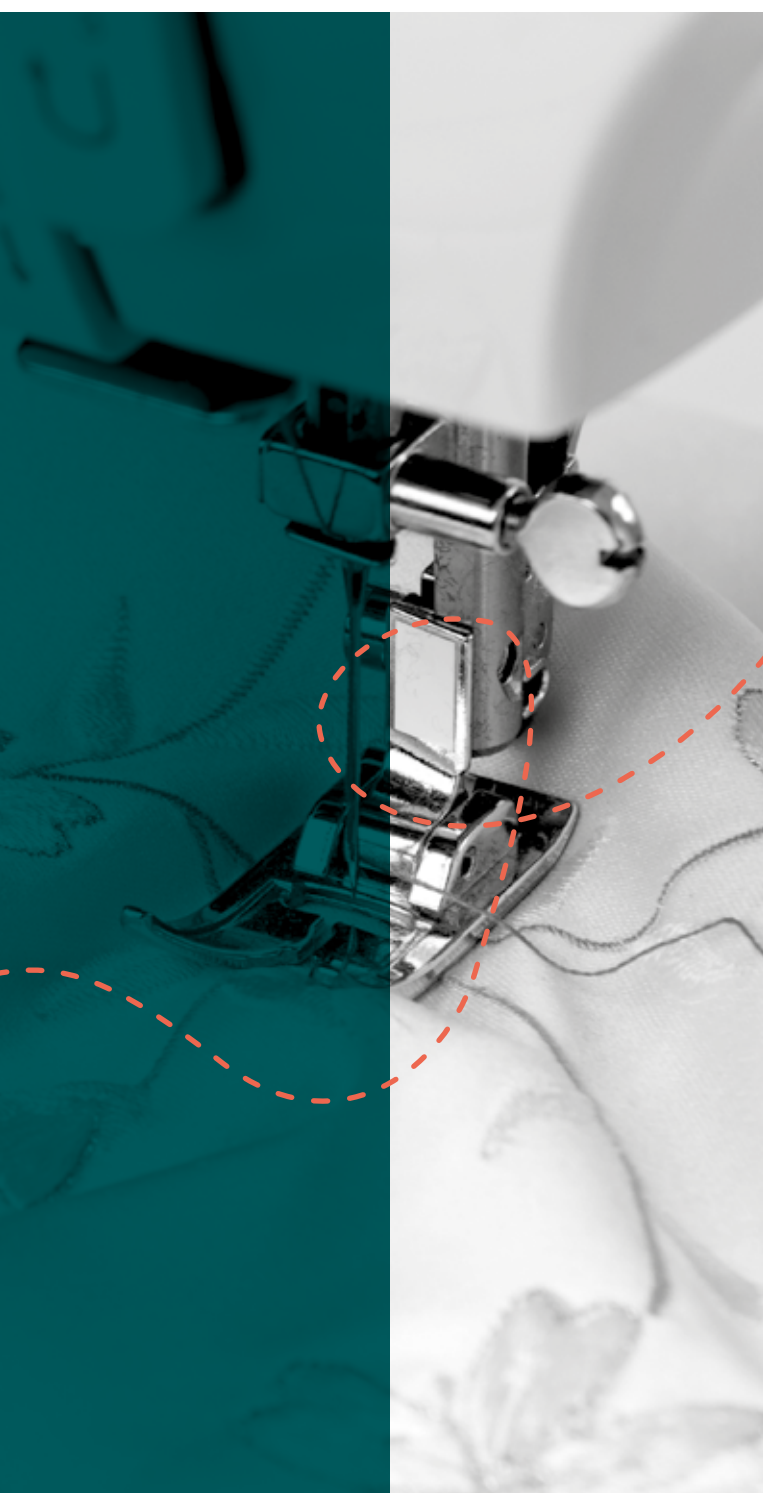

All of them in their different textures and varieties.

In addition, at **Texcon y Calidad** we have an industry-approved training unit, awarding our students a Professional Certificate qualification.

# WORK AREAS

EMBROIDERING DREAMS,  
SEWING STORIES,  
WEAVING HOPES...

# WORK AREAS

WE MANUFACTURE ON DEMAND

## PATTERN MAKING AND GRADING

We use a CAD-CAM system with conversion software for several systems (Gerber etc.), also including a drawing plotter.

## CUTTING

Our cutting system is composed of an Autex fabric spreader machine and vertical machines of several inch sizes depending on the thickness and texture of the materials (cotton, gauze, fur, felt, etc.). We also have a band-knife cutting machine for block cutting after heat transfer printing.

## PRODUCTION AND SAMPLE SETS

Our multi-purpose assembly line can be adapted to the quantities required by our clients. We manufacture on demand using modern machinery. Sample sets and prototypes get a different treatment, with specially qualified personnel assigned to this kind of products.

## QUALITY CONTROL CALIDAD

We have individual quality control processes in place, together with a thorough final inspection of the garments to identify any potential manufacturing flaws.

## LABELLING AND PACKING

All the production garments and sample sets are packed with client-provided items (cartons, prices, spare buttons, bags, self-locking bags, etc.) in order to supply the final product for shipment with the required presentation according to client specifications. The garments can be either delivered on transport racks or shipped in boxes with the appropriate packing list.

## STORAGE

We have a spacious storage facility with large hanger racks for storing any volume of goods if required.

# SERVICES

A HANDICRAFT  
PROCESS WHICH  
REQUIRES  
GOOD HANDS  
AND PLENTY OF  
CARE IN EVERY  
MOMENT

# SERVICES

# WHY TEXCON?

THANKS TO OUR EXPERIENCE,  
WE MAKE CLOTHES FOR  
GREAT NATIONAL AND  
INTERNATIONAL FASHION  
BRANDS

# WHY TEXCON?

QUALITY / ADAPTABILITY / ASSURANCES

## QUALITY

Quality is present in all our processes, which involve careful hand crafting: at Texcon, every finished piece is proof of our commitment to our customers, reflected in the quality of every aspect of the clothes-making process.

## ADAPTABILITY

We cater to the real needs of our customers:

- **Capability:** At Texcon we have the capability to carry out the ENTIRE process involved in producing a piece of clothing: pattern making, grading, cutting, production, quality control, labelling, and packing.
- **Volume:** At Texcon we have the ability to adapt to the production volumes required by our customers, from a single unit or limited sample set productions to large production runs.

## ASSURANCES

Our history and extensive experience in the clothing industry are an assurance of the know-how and quality standards we offer our customers. In addition, we are known for strictly meeting all delivery deadlines.

# WHY TEXCON?

COMMITMENT / INNOVATION

## COMMITMENT

Quality is in our DNA, which is why we are also a **TRAINING PROVIDER**, with the aim of promoting the creation of new dressmaking talents who will inherit and carry on with Spain's quality clothes making tradition.

## INNOVATION

Innovation of the process, people and resources. Purchase of machinery of high output for the clothing industry, as the cutting machine Lectra Vector Fashion IQ 50:

- Automatic optimization of the cutting path and tangent pieces.
- Real-time process monitoring.
- Compatible with all CAD systems.
- Up to 5% material savings.

# CORPORATE SOCIAL RESPONSIBILITY

**TEXCON y CALIDAD** has undergone a **SMETA Audit**. A SMETA audit is an auditing process which provides a compilation of the **best practices for the ethical auditing** of companies and is **internationally recognised**.

With this audit, we can certify the quality of **TEXCON y CALIDAD** in responsible business practices. The audit covers the following four areas: **labour, health and safety, environment and business ethics**.
